

Skyler Black

LETHBRIDGE COLLEGE STUDENT

Skyler.black@lethbridgecollege.ca | 403-634-5985 | Lethbridge Alberta

To:

Zyris software
Web designing company.
Calgary Alberta

Dear Hiring Manager

I am writing to express my interest in becoming a software/web developer within your company. I believe that I have the skills to enter the junior program that you have opened. I am currently a student in the computer information technology program here at Lethbridge college.

By the end of this year, I will acquire my diploma in CIT, and I already have a fair knowledge in many web developer languages such as HTML, CSS, and JavaScript. Within this program I have already created many websites that have received very positive feedback from my fellow classmates and instructors.

As I strive to learn more about becoming a great software/web developer, given the chance to work for your organization, I will be able to expand on my knowledge and gain new skills that will help me become a better web developer and designer as I work to become a great software/web developer.

I am eager to apply my unique skills to your work environment and prove that I am an excellent fit.

Thank you for considering my application, I hope to hear from you very soon.

Sincerely

Skyler Black

Initial job posting

Junior Software Developer

Zyris Software

Calgary, AB

You must create an Indeed account before continuing to the company website to apply

[Apply on company site](#)

Full job description

Our Junior software developers are curious, enthusiastic, and eager. Near the beginning of your career, Zyris is looking for individuals who shine a cut above their peers. In addition to being hard-working, and dedicated to your craft, you're the type of person that thinks outside the box and is always tinkering with new ideas. You're not just 'Ok' with the status quo and much like a sponge, you soak up new and interesting ideas to solve problems.

Responsibilities

- Follow detailed requirements documents and create usable creative assets.
- Collaborate with other team members under senior leadership to solve technical and software related problems.
- Self-direct skill improvement tasks.
- Committed to continued career in asset development.
- Knowledgeable and up to date with latest industry best practices.

Minimum Qualifications

- Minimum of 1 year of experience in a related position with at least one other employer.
- Experience and strong understanding of logic and logical processes to solve complex software related problems.
- Knowledge of Adobe CSuite, Photoshop, and Illustrator.
- Good written and verbal communication skills, including the ability to request clarification on unclear requests, communicate limitations, or request help when necessary.
- Ability to work self-directed tasks with good time management skills.
- Good research skills including identifying when research is required, validating credible sources, and self-directing research related tasks.
- Minimum of 1 year of experience in software or web development industry.
- Minimum of 3 employment or academic related references.
- Portfolio of previous work.

Preferred Assets

- Experience developing graphic assets in a team environment.
- Up to 3 years of experience in the software development or web development industry.
- A Degree, Diploma, or related experience in the field of Visual Communication.
- Experience using project management and source control tools.
- A reference letter from a previous employer.
